***** Checking ports *****

Skipped

***** END of the Port Scanning *****

***** Checking IDS (OSSEC) *****

Checking system for presence of OSSEC HIDS and its state

Could not find OSSEC HIDS in the System - [NOT INSTALLED]

***** END of the IDS check *****

***** Checking WAF (Modsecurity) *****

checking Apache Modsecurity Firewall Settings

Reading /etc/modsecurity/modsecurity.conf

Modsecurity - [NOT INSTALLED]

***** END of the ModSecurity check *****

***** Checking DB (MySQL) *****

Your Database Credentials:

Host Name: localhost

User Name: root

Password: *****

DB name:

The Credentials are correct to connect...

User Details:

No of User: 4

Distinct Users:

Users[0]:root

Users[1]:debian-sys-maint

Users[2]:phpmyadmin

Users[3]:rsyslog

DB server port : **Default Port Is Open : 3306 - [WARNING] Recommendation**
Users with Blank Password : **No Blank Passwords For Any User.- [OK]**
Existence of Root user : **"root" user has not been renamed. root user allowed to access from 4 different hosts.- [WARNING] Recommendation**
Existence of Anonymous user : **No Anonymous User Exists. - [OK]**
Database Accessibility : **No User can access from ANY hosts which is a good practice to follow - [OK]**
DB Connection Encyption : **Warning: SSL Is Disabled. - [WARNING]**
Binary log status : **Binary Logging Is Disabled. - [WARNING]**
Slow query status : **Warning: Slow Query Logging Is Disabled - [WARNING]**
Local Infile command status : **'LOAD DATA LOCAL INFILE' Is Enabled.- [WARNING]**

Final Pointers :

Out of 4 Audit Factors:

3 - **Pass.**

1 - **Warnings.**

0 - **Errors.**

Checked All areas from audit check list. Please Take necessary actions to secure database.
